SPIRITS

BOURBON

Bourbon whisk(e)y is a type of american whiskey, barrel-aged distilled spirit made primarily from corn. The name is ultimately derived from the french bourbon dynasty, although it is disputed whether bourbon county in kentucky or bourbon street in new orleans inspired the whiskey's name. Bourbon has been distilled since the 18th century. The use of the term "bourbon" for the whiskey has been traced to the 1820's, and the term began to be used consistently in kentucky in the 1870's.

RYE

Rye whiskey was the prevalent whiskey of the northeastern states, especially pennsylvania and maryland. Pittsburgh was the center of rye whiskey production in the late 1700s and early 1800’s. By 1808, allegheny county farmers were selling one half barrel for each man, woman and child in the country. Rye whiskey largely disappeared after prohibition. A few brands, such as old overholt, survived it, although by the late 1960’s even pennsylvania names such as old overholt were being distilled only in kentucky.

GENTLEMAN JACK15

CANADIAN WHISKEY

Several hundred years ago, when Canadian distillers began adding small amounts of highly-flavourful rye grain to their mashes people began demanding this new rye- flavoured whisky, referring to it simply as “rye”. Today, as for the past two centuries, the terms “rye whisky” and “Canadian whisky” are used interchangeably in canada and (as defined in Canadian law) refer to exactly the same product, which generally is made with only a small amount of rye grain.

IRISH WHISKEY

Irish whiskey was one of the earliest distilled drinks in europe, arising around the 12th century. It is believed that Irish monks brought the technique of distilling perfumes back to Ireland from their travels to the mediterranean countries around 1000 a.D. The Irish then modified this technique to obtain a drinkable spirit. Whiskey was first recorded in Ireland in 1405.

JAPANANESE WHISKEY

The production of Japanese whisky began as a conscious effort to recreate the style of Scotch Whisky. Pioneers like Taketsuru carefully studied the process of making Scotch Whisky, and went to great lengths in an attempt to recreate that process in Japan.

MARS

In 1985, hombo brewing, a japanese “shochu” maker from kagoshima prefecture on the island of kyushu, founded the shinshu distillery in miyata village in nagano prefecture as a base for the production of whisky and brandy.

SCOTISH WHISKEY

Scotch whisky evolved from a Scottish drink called uisge beatha, which means “water of life”. The earliest record of distillation in Scotland occurred as long ago as 1494, as documented in the exchequer rolls, which were records of royal income and expenditure.

HIGHLANDS & ISLANDS

Fruitcake and oak flirt with heather and smoke in highland whiskies. Wild seas and impenetrable moorland dominate the landscape, creating a breeding ground for powerful peaty drams, whilst still leaving room for floral, silky elegance the versatility of the islands accommodates both feathery citrus flavours and smoking peaty noses. Between them, Arran, mull, jura, skye and orkney champion brine, oil, black pepper, heather and honey. For challenging, volcanic drams full of maritime notes that are anything but tame, island malts are your calling.

BRANDY

The origins of brandy were clearly tied to the development of distillation. While the process was known in classical times, it wasn't used for significant beverage production until the 15th century. Initially wine was distilled as a preservation method and as a way to make it easier for merchants to transport. It is also thought that wine was originally distilled to lessen the tax which was assessed by volume. The intent was to add the water removed by distillation back to the brandy shortly before consumption. It was discovered that after having been stored in

wooden casks, the resulting product had improved over the original distilled spirit.

RUM

The first distillation of rum took place on the sugarcane plantations of the Caribbean in the 17th century. Plantation slaves first discovered molasses, a byproduct of the sugar refining process, could be fermented into alcohol later, distillation of these alcoholic byproducts concentrated the alcohol and removed impurities, producing the first true rums. Tradition suggests rum first originated on the island of Barbados.

GIN

Gin is a spirit which derives its predominant flavour from juniper berries. From its earliest origins in the middle ages, gin has evolved from a herbal medicine to an object of commerce in the spirits industry. Gin was developed on the basis of the older jenever, and became popular in great britain when william of orange, leader of the dutch republic, occupied the english, scottish and irish thrones with his wife mary. Gin is one of the broadest categories of spirits, represented by products of various origins, styles, and flavour profiles that all revolve around juniper as a common ingredient.

VODKA

The word “vodka” was recorded for the first time in 1405 in akta grodzkie, the court documents from the palatinate of sandomierz in poland. At the time, the word vodka (wódka) referred to medicines and cosmetic products, while the beverage was called gorzałka (from the old polish gorzeć meaning “to burn”), which is also the source of ukrainian horilka. The word vodka written in cyrillic appeared first in 1533, in relation to a medicinal drink brought from poland to russia by the merchants of kievian rus.

Tequila was first produced in the 16th century near the location of the city of tequila, which was not officially established until 1666. The aztec people had previously made a fermented beverage from the agave plant, long before the spanish arrived in 1521. When the spanish conquistadors ran out of their own brandy, they began to distill agave to produce one of north america’s first indigenous distilled spirits.
